

General Risk Assessment – Linnet Clough Scout Camp and Activity Centre

LCB 721

Assessment Location: Camping Field Toilets and Shower Block

Assessment Date: Wednesday 15 June 2022

Assessment Undertaken By: John Smith, Chairman

Assessment Accepted By: Carl Hornsby, Manager

Assessment Review Date: 15 June 2024 - 24 months from assessment date or where significant change has occurred

This Risk Assessment has been undertaken and prepared for the use of Segen for safety management purposes and is pertinent to them and not any other party. The assessments do not imply that there are no other hazardous conditions. The opinions expressed and facts described were valid on the date recorded.

Risk matrix								
Risk rating guidance	Likelihood (L)	5	5	10	15	20	25	Likelihood (L) x Severity (S) = Risk rating (RR).
		4	4	8	12	16	20	
		3	3	6	9	12	15	
		2	2	4	6	8	10	
		1	1	2	3	4	5	
			1	2	3	4	5	
		Severity (S)						
Acceptability of risk guidance	High-risk: 15 – 25		High-risk activities should cease immediately. Further effective control measures to mitigate risks must be introduced.					
	Medium-risk: 8 – 12		Medium-risks should only be tolerated for the short-term and only whilst further control measures to mitigate the risks are being planned and introduced.					
	Low-risk: 1-6		Low-risks are largely acceptable. Where it is reasonable to do so, efforts should be made to reduce risks further.					
Guidance. When completing a risk assessment, you should:	<ol style="list-style-type: none"> 1. Identify the persons at risk and the significant hazards. 2. Calculate an initial RR for the activity. 3. Identify risk control measures that reduce the risks to an acceptable level. 4. Calculate a revised RR - you should consider how much safer the task will be if the control measures are followed. Here, you should consider changing both the likelihood (L) and the severity (S) ratings. 							
Note. Ideally, you should look to reduce the risks so that the task can be classified as “low risk”.
